

Frederick Albert Matsen IV

Computational Biology Program
Fred Hutchinson Cancer Research Center
1100 Fairview Ave. N., M1-B855
P.O. Box 19024
Seattle, WA 98109-1024
(206) 667-7318
matsen@fredhutch.org
<http://matsen.fredhutch.org/>

530 Broadway E #230
Seattle, WA 98102

Positions

- Associate Member**, Fred Hutchinson Cancer Research Center, Seattle.
April 2015 – Present
- Affiliate Associate Professor**, Genome Sciences, University of Washington, Seattle.
March 2017 – Present
- Affiliate Associate Professor**, Statistics, University of Washington, Seattle.
June 2016 – Present
- Assistant Member**, Fred Hutchinson Cancer Research Center, Seattle.
August 2010 – March 2015
- Miller Postdoctoral Scholar**, UC Berkeley, Berkeley, California.
July 2007 – July 2010
- Allan Wilson Postdoctoral Scholar**, University of Canterbury, Christchurch, New Zealand.
July 2006 – June 2007

Education

- Harvard University**, Cambridge, MA.
Ph.D. in Mathematics, June 2006.
- Université de Paris 13**, Paris, France.
D.E.A. in Mathematics, June 2001.
- Stanford University**, Stanford, CA.
B.S. in Mathematics with honors, June 2000.

Grants:

- primary investigator** **HHMI-Simons Faculty Scholar Award** (11/01/2016 – 11/01/2021)
\$900,000 total cost
- NSF Award 1564137** (07/01/2016 – 06/30/2020)
Enabling phylogenetic inference for modern data sets.
Co-PI with Vladimir Minin. \$824,898 total cost
- R01 GM113246-01** (08/01/2014 – 08/01/2019)
Leveraging deep sequencing data to understand antibody maturation.
\$1,888,860 total cost
- NSF Award 1223057** (09/01/2012 – 08/31/2017)
New theorems and algorithms for comprehensive analysis of metagenomic data via statistical phylogenetics.
Co-PI with Aaron Darling. \$812,615 total cost
- R01 HG005966** (09/27/2010 – 06/30/2013)
Novel Computational Tools for Studying the Human Microbiome.
Co-PI with David Fredricks. \$1,520,743 total cost

ITHS pilot grant (02/01/14 – 02/01/15)

Inferring statistical models of antibody somatic hypermutation from high-throughput sequencing data

CFAR New Investigator Award (01/01/14 – 01/01/16)

Machine learning, informed by structural knowledge, to expand our knowledge of APOBEC3 specificity and improve hypermutation inference

Grant support:
co-investigator

R01 AI138709 (2018/02/07 – 2023/02/07)

Characterizing the Broad Antibody Response to HIV Superinfection

PI: Julie Overbaugh.

Our role: our group will design and perform all the B cell receptor sequence analysis for this project.

R01-AI120961 (2016/01/01 – 2020/12/31)

Defining the Infant Immune Response to HIV.

PI: Julie Overbaugh.

Our role: our group will design and perform all the B cell receptor sequence analysis for this project.

Bill and Melinda Gates Foundation OPP1110049 (08/31/2014 – 7/31/2016)

Biostatistical, Computational Biology, and Mathematical Modeling for the Assessment of Immune Correlates of Protection in the HVTN 701 and 702 Efficacy Trials in South Africa.

PI: Peter Gilbert.

Our role: Improve methods for reconstruction of HIV molecular sequences which found infection using later time point samples.

R37 AI038518-16A2 (03/01/2010 – 02/28/2015)

Early and Reinfection in High Risk Women.

PI: Julie Overbaugh.

Our role: our group has designed and performed all the bioinformatics for this project.

R21 AI104449-01 (02/15/13 – 01/31/15)

PrEP Exposure during HIV-1 Infection and the Risk of Low-Frequency ARV Resistance.

PI: Dara Lehman.

Our role: our group has designed and performed all the bioinformatics for this project.

U54GM111274-01 (09/12/2014 – 06/30/2019)

Center for Statistics and Quantitative Infectious Diseases.

PI: Elizabeth Halloran.

Our role: design and implement computational phylogenetic algorithms for pathogen sequence data.

Awards

HHMI-Simons faculty scholar (November 2016 – October 2021)

Research support for five years.

Miller fellow (July 2007 – July 2010)

Support for three years of postdoctoral research at UC Berkeley.

Allan Wilson postdoctoral fellow (July 2006 – June 2007)

Support for one year of postdoctoral research.

NSF graduate research fellow (July 2003 – June 2006)

Support for three years of study.

Harvard University certificate of distinction in teaching (Fall 2004)

For teaching second semester calculus.

Jean D. Valpine fellowship (September 2001 – June 2003)

Support for two years of study.

Fulbright fellowship (July 2000 – June 2001)

To study mathematics in Paris.

Hoefler prize for excellence in undergraduate writing (July 1998)

For a mathematics paper in real analysis.

Research interests	phylogenetics, innate and adaptive immunity, infectious disease, human microbiome, Markov processes, coalescent theory, molecular evolution, macroevolutionary models, discrete geometry, combinatorics, Bayesian statistics, bioinformatics.
Activities	<p>PhD committee member: John Huddleston and Anna Minkina, since 2018.</p> <p>PhD committee member: Sarah Hilton and Sydney Bell, since 2016.</p> <p>Invited session organizer: <i>Bernoulli Society World Congress in Probability and Statistics</i>, July 2016.</p> <p>Mentor: Summer Undergraduate Research Program, Summer 2016.</p> <p>Mentor: Summer High School Internship Program, Summer 2014-6.</p> <p>Organizer: Spotlight session on next generation phylogenetic inference, <i>Joint Evolution Meetings</i>, June 2016.</p> <p>Leader: Tools and Resources Working Group, Adaptive Immune Receptor Repertoire Community.
